BAYSCAN MS916

The MS916 offers mobile workers a user-friendly, three-button operation that is very easy to use, requiring no special training. The bright, easy-to-read 1-inch OLED display gives feedback of the scanned information to reduce errors. It supports real-time data transmission, and the 128 x 64 resolution display makes it easy for the user to configure the scanner. Through its wireless technology, the MS916 connects quickly and easily to virtually any laptop, tablet, or smart phone host—Windows, Android or Apple iOS. It can operate for distance up to 30-feet in open space. Additionally, the MS916 has a flash memory storage capacity of 16MB (the equivalent of over 100,000 scans), making data loss extremely unlikely, even when it is out of range of the wireless signal. This allows mobile users to complete long tasks without interruption. At the rate of one scan every five seconds, the battery will last 8 hours on a single charge.
