

## Operations Board Report April 2015

### Delivery Accomplishments:

This is the second month of a pilot project in Edwardsville, using the SHARE software to alert the drivers when a pick up is needed at an affiliate library.

We are one step closer to using technology to collect statistics from our drivers. Brant Wingerter is in the final phase of developing software to capture the information we need that is currently input manually.

The Help Desk is ready for rollout within the next two weeks.

### Delivery Outreach:

Attended the LIBNET meeting in Mt. Vernon

Attended Reaching Forward South conference in Springfield

### Building Updates:

#### *Champaign*

Will be having the Champaign building appraised for cost benefit analysis of roof replacement and relocation.

#### *Du Quoin*

Working with landlords to make sure the landscaping is done in a timely fashion.

Roof still has a temporary repair.

#### *Edwardsville*

Rental contracts are being evaluated.

Respectfully submitted,

Susan Palmer
